

ClearOS Documentation

DrawBridge units which are using ClearOS for the base operating system can configure network interface and basic Firewall settings with the Webconfig panel: <https://draw.bridge:81>

Contact Compass Foundation Support for access credentials to this interface.

For assistance with ClearOS Webconfig components, please refer to the official ClearOS 7 documentation: <https://www.clearos.com/resources/documentation/clearos-7-documentation-overview>

FAQ:

Q: How do I know if my DrawBridge is running on ClearOS?

A: Visit your [DrawBridge System Overview page](#) and see what is specified for the **Platform** parameter under the **System** heading. (Note: Sign-in and adequate permission group membership is required to view this information.)
