

Prepping to enroll an iOS device

1. Device must be set up and filter connection confirmed per instructions [here](#).
2. Confirm that the device is present on the filter and all filter policies are applied as needed.
3. Enroll the device using Apple Configurator.

This MUST be complete before proceeding to step 4

4. From the device record, click the **Wrench** button in the upper right and choose Sync to MDM.
 - This will apply any accountability required management settings and app restrictions.
