

Configuration

Technical DrawBridge system configuration settings. (Does not contain filter settings; see **Content Filter** for content filter settings.)

Local Settings

DrawBridge system identity details, specific to this system.

Parameter	About
Name	Globally-unique name of this DrawBridge
Local	Yes/No -- this record belongs to this hardware
Admin URL	The URL and port number for the management interface (if no port is displayed, the default is 443)
Cloud Server	Yes/No -- this system is/is-not a "cloud filter"
Rebranded	Yes/No
Project Name	Brand information
Console Name	Brand information
Filter Name	Brand information
Hostname	Brand information
Slogan	Brand information
Phone	Brand information
Email	Brand information
Canonical ID	Globally-unique identifier for this DrawBridge
Sync Role	Publisher/Subscriber -- role of this DrawBridge in the Synchronization ecosystem

Appliance Companies

List view of all tenant Company records; displays Company-Appliance/DrawBridge relationship. Typically only relevant in the context of the Synchronization ecosystem.

Backups

List view of system database backups. (Database backups are automatically uploaded to Compass Foundation offsite storage.)

Email Settings

Configuration details regarding email alerts. Managed by Compass Foundation.

Parameter	About
Host	Mail Server domain
Port	Port for SMTP
Use TLS	Yes/No
Verify TLS	Yes/No
From Address	Brand information
Username	Username to use with email server for authentication

Certificate Authority

Information regarding the Certificate Authority, SSL Certificates, and Software (Client SSL Cert Installers) in-use on the DrawBridge. Relevant primarily when ☐ Rebranded = ☐ Yes (see Local Settings, above).

DrawBridge Terminal

Applicable only to systems running DrawBridgeOS. Does not apply to ClearOS-based systems. (See the Platform field in your DrawBridge [System Overview](#) page to see which operating system your DrawBridge is running.)

Modes of operation

More information coming soon.
