Media Room

The Media Room enables the classification of videos hosted on public video hosting websites, such as YouTube.

> For the Media Room to work, the YouTube and Vimeo category must be left at its default blocked setting on the access policy dashboard. * Manually setting the YouTube category to block will block the Media Room and setting the YouTube category to allow will bypass the Media Room

Videos

The Videos module displays a list view of all the videos the DrawBridge has classified.

Click the title of a video in the list to view the video classification record.

Video record view

A video classification record has the following parameters:

Parameter	About
Title	The title of the video
ID	The unique hash identifier provided by the video platform (if available)
Duration	The length of the video
Service	The platform that is hosting the video
Size	The resolution of the video, expressed in a pixel ratio
Channel	The DrawBridge-classified Channel associated with the video, if any (see Channels, below)
Category	The top-scoring Category for this video, determined by the DrawBridge content classifier
Rating	The DrawBridge Classifier rating of the video, based on the top-scoring Category

Record header buttons:

- **Create** a new video classification record with the blue **+** Create Video button
- **Edit** this video classification record with the green pencil Update Video button
- **Delete** this video classification record with the red trashcan Delete Video button
- Hamburger menu:
  - **Get Category review**: jumps to a support ticket form to request clasification by a human
  - **Video Views by User**: jump to **Reports: Media Views** module
  - **References to this video**: jump to **Content Filter: Media Room: Pages Linking to Media**
- **Bookmark** this record with the ribbon bookmark button
- Sync Menu (chain-link icon)
  - **Mark to Resync**: flag this record in the background to be included in the next sync run

Video Permissions

Jump to the Permissions record that applies to this video (see Permissions section, below). Displays lists views of people records with membership in the Media Admin and Media Viewer permission groups.

Informational tabs

Details

The Details panel contains:

- If the origin platform is supported: thumbnail of the video will be displayed with a `Play` button below it (if the video passed the classifier configuration to be allowed to play)
- The Description of the video, fetched from the platform hosting this video
- The Genre(s) of the video, determined by the DrawBridge classifier
- The Tags associated with the video, fetched from the platform hosting this video

Classification

A list view of any Category Classifications for this video

Classify a new video

1. Click the **+** button (Tooltip: `Create Classified Media`) in the upper right corner of the list view (or use the same **+** button on a video record page)
2. Enter the direct URL of the video you wish to classify. Note that it must be a direct link, not a URL-shortened link. For YouTube, the link should start as follows `https://www.youtube.com/watch?v=` + the unique hash of the video in question.

Channels

Displays a list view of media channels that should be automatically polled and classified.

Click the title of a channel to view the Channel record page

Channel Record view

A channel record has the following parameters:

Parameter	About
Source	URL of the channel
Title	Title of the channel
Last Updated	Timestamp of the last check of the channel for new videos
Category	Classifier category assigned to the channel by a Media Room administrator
Rating	Classifier rating, based on the assigned Category, above

Record header buttons:

- **Add** a new channel to be classified with the blue **+** Create Channel button
- **Edit** this channel record with the green pencil Update Channel button
- **Delete** this channel record with the red trashcan Delete Channel button
- Hamburger menu:
  - **Get Category review**: jumps to a support ticket form to request clasification by a human
  - **Channel Videos**: jump to list view of the videos contained in this channel
  - **Channel Permissions**: jump to a list view of the Permission Groups (with associated Company info) that may view/modify this Channel (see Permissions section, below)
- **Bookmark** this record with the ribbon bookmark button
- Sync Menu (chain-link icon)
  - **Sync Mode** (default is 2 Way - Push / Pull from Server); click record sync information
  - **Push to Sync Publisher**: initiate a record update push from this DrawBridge to the Sync Server
  - **Pull from Sync Publisher**: initiate a record update pull to this DrawBridge from the Sync Server
  - **Mark to Resync**: flag this record in the background to be included in the next sync run

`<number>` Channel Videos

Jump to a list view of all the videos in this channel that have been classified by the DrawBridge. Clicking an individual record will display a Video Record view, as described above.

Channel Permissions

Jump to the Company Channels permissions group list, which displays any Permission Group + associated Company information assigned to this channel. See Permissions, below.

Permissions

Video Permissions

Set the Permission Group in which Users must be members to view a specific video. (If a video is in a Channel, the Video Permission Group overrides the Channel Permission Group.)

Displays a list view of Media records and the corresponding Permission Group assigned by the associated Company. Click a Media record link in this view to view a Video Permission record.

Record View

A Video permission record view contains the following parameters:

Parameter	About
Media	The title of the video to which this Video Permission record applies

Parameter	About
Company	The Company associated with this Video Permission record
Permission Group	The associated, Company-assigned, minimum Permission Group required to view this video

Video Permission Record header buttons:

- **Add** a new Video Permission Record with the blue **+** Create Video Permission button
- **Edit** this Video Permission Record with the green pencil Update Video Permission button
- **Delete** this Video Permission Record with the red trashcan Delete Video Permission button
- **Bookmark** this record with the ribbon bookmark button
- Sync Menu (chain-link icon)
    - **Create on Sync Publisher**: push this record to the Sync server (only visible for newly-created records)
    - **Mark to Resync**: flag this record in the background to be included in the next sync run

- Media Viewer Group

FAQs:

Q: Why does the title of a video just display ⬚?

A: The title of the video was not able to be acquired. The video may have been embedded as part of another webpage.
