

Preferences

Preferences enable you to:

- configure minimum Permission Groups required to perform a specific action (see Permissions and Relationships page for more information), and,
- configure other feature thresholds and behaviors

Preference Tenancy

Preference record tenancy association is available to both Companies and Accountability Policies. Each Preference Record has a field indicating the associated Company or Policy, thus communicating the tenancy association.

If a Preference detailed here is not present on your DrawBridge, simply create it with the + button in the upper right corner of the list view for that Section. Then you can assign the Records to that Preference as desired.

Preferences associated with an Accountability Policy override any conflicting preferences associated with a Member Company.

Priority	Relationship	Override lower priority configuration
1	Accountability Policy	Yes
2	Company Owner	(NA)

To clarify: if there is no Accountability Policy associated with a Company, the notes about Accountability Policy override do not apply.

Preference Record Sections

Heirarchy:

- **Section**
 - **Preference**
 - **Record**

As implemented:

- **Filter Console** (*Section*)
 - **Access Valve Permissions** (*Preference*)
 - **Widen Access Privileges** (*Record*) and so forth
 - App Store Settings
 - Safe Search Settings
 - Media Room
 - Viewability
 - Channels
 - Block Page Overrides
 - AutoFix Settings
 - Human Review Settings

Preferences, in detail

Filter Console

Access Valve Permissions

Record Name	Value	About
Widen Access Privileges	<input type="text" value="Company Owner"/> / <input type="text" value="Accountability Contact"/> / <input type="text" value="Accountability or Filter Admin"/>	Set minimum Permission Group required to set a Category to Allow
Restrict Access Privileges	<input type="text" value="Company Owner"/> / <input type="text" value="Accountability Contact"/> / <input type="text" value="Accountability or Filter Admin"/>	Set minimum Permission Group required to set a Category to Block

App Store Settings

Record Name	Value	About
Permission Group	<input type="text" value="Company Owner"/> / <input type="text" value="Accountability Contact"/> / <input type="text" value="Accountability or Filter Admin"/>	Set minimum Permission Group required to "open" an App Store

Safe Search Settings

Record Name	Value	About
Name of Service eg. Bing, YouTube, etc	<input type="text" value="Yes"/> / <input type="text" value="No"/>	Enable the platform-provided Adult content blocking

Media Room

Viewability

Record Name	Value	Contents	About
Category Actions	Always Block Categories / Always Allow Categories	List of Categories	Configure the Media Room action for specified Categories
Viewability Status	Allowed Categories Only / Allowed Category or Unclassified / Viewing Classified Media Disabled	(N/A)	Configure the "permissiveness" of the Media Room

In detail:

- **Category Actions:** The Media Room will Allow or Block a video from playing based on the top-scoring category it scores/classifies as. The Category Actions records here allow you to set a list of Categories that will Always or Never play when a video has a top score in the category(ies) you specify.
- **Viewability Status:** Set the behavior of the Media Room:
 - **Allowed Categories Only:** Only videos which have a top score in a Category set to Allow will play. Videos with a top score in a Category set to Ignore or Block will not play.
 - **Allowed Category or Unclassified:** In addition to the videos matching Allowed Categories, above, if a classification can not be automatically made, the video will still be allowed to play. This is the most permissive setting.
 - **Viewing Classified Media Disabled:** The Media Room will not allow any videos to play, regardless of the classification.

Channels

Record Name	Value	About
Permission Group	Media Admin / Accountability Contact / Accountability or Filter Admin	Set minimum Permission Group required to add a Channel for automatic classification

Block Page Overrides

AutoFix Settings

Record Name	Value	Contents	About
-------------	-------	----------	-------

Category Actions	<input type="checkbox"/> Always Allow Categories / <input type="checkbox"/> Always Block Categories	List of Categories	Always Allow or Block the AutoFix request for specified categories
Level 1 Enabled	<input type="checkbox"/> Yes / <input type="checkbox"/> No	(N/A)	Enable AutoFix Level 1 behavior
Level 2 Enabled	<input type="checkbox"/> Yes / <input type="checkbox"/> No	(N/A)	Enable AutoFix Level 2 behavior
Level 3 Enabled	<input type="checkbox"/> Yes / <input type="checkbox"/> No	(N/A)	Enable AutoFix Level 3 behavior
Skip Owner Confirmation	<input type="checkbox"/> Yes / <input type="checkbox"/> No	(N/A)	Specify whether Company Owner contact confirmation is required for an Autofix request.

If Owner Confirmation is required, an AutoFix request will email the Company Owner contact, who will need to sign-in and approve the request before it can proceed.

Human Review Settings

Record Name	Value	Contents	About
Category Actions	<input type="checkbox"/> Always Allow Categories / <input type="checkbox"/> Always Block Categories	List of Categories	Always Allow or Block the Human Review request for specified categories
Skip Owner Confirmation	<input type="checkbox"/> Yes / <input type="checkbox"/> No	(N/A)	Specify whether Company Owner contact confirmation is required for an Human Review request.

If Owner Confirmation is required, a Human Review request will email the Company Owner contact, who will need to sign-in and approve the request before it can proceed.

Preference Record View

Create a preference record by clicking the + button in the upper right of the list view in any of the Sections above.

Edit a Preference record by clicking the green pencil Edit button on the relevant line.

View a Preference record by clicking on the blue navigate-symbol View Preference button on the relevant line.

Each Preference record will display:

Parameter	About
Company/Policy	The tenancy association (Company or Accountability Policy) of the record
Canonical ID	The globally-unique identifier for the record
Preference Setting	What the record does

Records which contain Category List views have these options:

- Add a Category with the **+ Add** button above the list area
- Remove a Category with the red trashcan Delete button on the relevant Category line
