

# Introduction to the DrawBridge Console

A tour of the web console for the DrawBridge.

# Get signed-in

Welcome to the DrawBridge web console! Let's get you signed-in:

1. Ensure you're on a DrawBridge-protected local network
2. Visit <https://draw.bridge> in your browser
3. First visit? Set your password with the Forgot Password link: use the email address you gave Compass when purchasing the DrawBridge.

Do you administer multiple DrawBridge units or use multiple Compass services? Contact support to get set up with Clavis SSO (Single Sign-On).

The screenshot shows the DrawBridge web console login interface. At the top left is the DrawBridge logo. In the top right corner, there is a small blue button labeled "Logout". The main heading in the center is "Welcome to the DrawBridge Console!". Below this is a "Console Login" form. The form contains two input fields: "Email Address" and "Password", each with a corresponding icon (a person and a key respectively). Below these fields is a blue "Login" button. Under the "Login" button is a link that says "Forgot Email or Password?". A yellow callout box with a red border and a red arrow pointing to the "Forgot Email or Password?" link contains the text: "If you don't know your 'Company Owner' password or you haven't set one up yet, please use the 'Forgot Email or Password' link to create a new password." Below the login form is a "Tech Support" section with three icons: a padlock for "SSL Certs", a person at a computer for "Remote Help", and a truck with a plus sign for "Quick Support". At the bottom of the page, there is a status bar that says "Network Traffic Control: Enable - Defend - Protect" on the left and a "Care Center" button on the right.
